Professional Summary

Information Technology student at Vellore Institute of Technology (CGPA: 9.14/10) targeting software engineering and full-stack development internships. Builds web applications with React, Next.js, TypeScript, Node.js, PostgreSQL, and Firebase. Contributes to a hospital operations product and student platforms, including a recruitment portal designed for 500+ students.

Education

Vellore Institute of Technology, Vellore July 2024 - April 2028
B.Tech in Information Technology *CGPA: 9.14/10*

Technical Skills

Programming Languages: C++, C, Python, Java, JavaScript, TypeScript, SQL
Web: React, Next.js, AngularJS, HTML, Tailwind CSS, Bootstrap, Chakra UI, Framer Motion, Vite
Backend and APIs: Node.js, Express.js, Flask, REST APIs, API integration
Databases and Authentication: PostgreSQL, MySQL, MongoDB, Firebase, Firebase Authentication
Tools and Concepts: Git, GitHub, AWS, Vercel, Prisma, Drizzle ORM, Neon, Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Experience

Solder Labs September 2026 - Present
Full Stack Developer Intern *Hybrid*

- Contribute to MediOS, a hospital operations platform that unifies patient records, scheduling, billing, staff management, and communications.
- Develop, integrate, and debug full-stack features with frontend and backend teams ahead of client deployment.

Advanced Developer's Group (ADG), VIT February 2025 - Present
Core Member, Web Development *Vellore, India*

- Develop responsive full-stack application features with React, Next.js, TypeScript, and Firebase alongside senior developers.
- Integrate APIs, optimize user interfaces, debug issues, and contribute to Git-based collaboration and deployment workflows.

Projects

HackGrid View project
Next.js, TypeScript, React, Tailwind CSS, Prisma, Neon, Firebase

- Built a full-stack platform to run a 36-hour auction-based hackathon, implementing team management, auction settlement, and SaaS problem allocation through backend APIs and database models.
- Developed a mobile-optimized judge evaluation system with team search, auction details, and structured scoring.

Contest Manager View project
Next.js, TypeScript, Express.js, PostgreSQL, Drizzle ORM, Firebase Authentication

- Integrated the CLIST API to aggregate Codeforces, LeetCode, and other programming contests, with server-side fetching, upcoming-contest filters, countdowns, and timezone-aware schedules.
- Built an Express.js and PostgreSQL backend with Drizzle ORM and Firebase Authentication for secure login and personalized contest tracking.

Recruitment Portal View project
Next.js, TypeScript, React, Python, Firebase, Tailwind CSS, Chakra UI

- Built a recruitment and assessment platform designed for 500+ students, with domain-based assignments, protected routes, and Google OAuth restricted to @vitstudent.ac.in accounts.
- Implemented real-time submission tracking, input validation, deadline enforcement, duplicate prevention, and responsive dashboards.

Achievements

- Peak ratings: Codeforces 1395 (Pupil), CodeChef 1603 (3-star), and LeetCode 1559.
- Achieved Global Rank 238 in CodeChef Starters 229, Division 3.
- Placed 3rd in a GDSC hackathon among 1,500+ participants.
