Education

Vellore Institute of technology, Vellore

CGPA: 9.14

B.E. - Information Technology

July 2024 - April 2028

Technical Skills

Languages: C/C++, Python, Java, SQL, JavaScript, TypeScript, HTML

Frameworks & Tools: React, Next.js, Vite, Vercel, AWS, Flask, Angular.js, Tailwind CSS, Bootstrap, Git, GitHub

Databases: PostgreSQL, MongoDB, MySQL, Firebase, Drizzle ORM

Backend & APIs: Node.js, REST APIs, Express.js, API Integration, JSON

CS Fundamentals: Data Structures and Algorithms, OOPS, DBMS, Operating Systems, Computer Networks

Experience

Solder Labs

Sept'26 – Present

Full Stack Developer Intern

Hybrid

- Contributing to the development of **MediOS**, a hospital operating system integrating patient records, scheduling, billing, staff management, and communication workflows into a unified platform.
- Collaborating across **frontend and backend teams** to support feature development, integration, debugging, and coordination of the product for upcoming client deployment.

Advanced Developer's Group

Feb'25 – Present

Core Member

Vellore Institute of Technology

- Selected as a Core Member in the Web Development domain of Advanced Developer's Club (ADG), collaborating with senior developers on full-stack projects and scalable web applications using modern development practices.
- Contributed to the development of responsive web solutions using React, Next.js, TypeScript, and Firebase while working on API integration, UI optimization, debugging, Git-based collaboration, and deployment workflows.

Projects

HackGrid | *Next.js, TypeScript, React, Tailwind CSS, Prisma, Neon, Firebase, REST APIs, Git*

[Link](#)

- Developed a full-stack platform for **HackGrid**, a 36-hour auction-based hackathon where participants bid for SaaS problem statements and build scalable solutions.
- Implemented core event workflows for **team management, auction settlements, and problem-statement allocation**, integrating frontend interfaces with backend APIs and database models.
- Built a mobile-optimized **judge evaluation system** with team search, auction/settlement details, and structured scoring to streamline the judging workflow.

Contest Manager | *Next.js, TypeScript, Express, PostgreSQL, Drizzle ORM, Firebase Auth*

[Link](#)

- Developed a full-stack contest aggregation platform that fetches and displays competitive programming contests from multiple platforms (Codeforces, LeetCode, etc.) using the **CLIST API**, enabling centralized contest discovery.
- Implemented server-side data fetching and optimized filtering logic to display upcoming contests within a defined time window, along with real-time countdown timers and timezone-aware formatting for contest schedules.
- Built a scalable backend using Express and PostgreSQL with Drizzle ORM for data persistence, while integrating Firebase Authentication to enable secure user login and personalized contest tracking features.

Recruitment Portal | *Next.js, TypeScript, React, Python, Firebase Auth & Database, Tailwind CSS*

[Link](#)

- Developed a full-stack recruitment and assessment platform for an ADG VIT club drive, enabling domain-based assignment submissions with secure authentication and protected routing for **500+ students**.
- Implemented Google OAuth authentication restricted to **@vitstudent.ac.in** accounts and built dynamic dashboards with **real-time submission tracking, validation, deadline enforcement, and duplicate submission prevention** using Firebase.
- Designed a responsive and interactive user experience using **Chakra UI, Framer Motion**, and modern React patterns, optimizing navigation flow, loading states, and overall application scalability.

Achievements

- CodeForces : Maximum Rating – **Pupil**(1395)
- CodeChef : Maximum Rating – **3***(1603)
- Leetcode : Maximum Rating – (1559)
- Achieved **Global Rank 238** in CodeChef contest Starters 229 Division 3
- Secured **3rd rank** in a hackathon among 1500+ freshers conducted by **GDSC**(Google Developers Student Club)
